|	OMNI Summit Microservice SDD Technical Review V1.X	Doc. Number	Rev.
Open Mind		**OMNI-SM-008**	**1**

Meeting Notes May 11th, 2022:

Meeting attended by Ivo Su, Jeffrey Herron, David Borton to review the OMNI Summit Microservice Software Design Document.

- Discussion confirming architecture's ability to support multiple devices as per requirements.
- Discussion regarding info service as means of querying aspects of microservice like repository objects.
- Terminology updates for 'servers' to 'grpc server objects'
- Added section 5 – "Programming Classes Description" to clarify where the classes fit into the software architecture
- Updated numbering to reflect added section
- Updated section title "wrappers" to "testing wrappers" to reflect their use
- Refreshed table of contents

SDD document appropriate for proceeding towards phase review.
